

Electronic signature consent

CONSENT TO ELECTRONIC RECORDS AND SIGNATURES

You may complete this booking on paper or electronically. Paper copies and assistance are available without charge from Gonchar Group LLC at goncharboats@gmail.com or from our staff. Choosing paper does not waive any right; allow time for check-in before your scheduled departure.

This consent applies to electronic delivery and signature of this booking's rental agreement, the applicable Prime participant/guardian forms, safety instruction records and your signed copies. Each document is presented separately. You must personally review and sign your own documents. An adult cannot sign for another adult. A parent or guardian signs only the applicable minor form for a child for whom they have authority.

You need an internet connection, a current browser with JavaScript and cookies enabled, and a device that can display, download and retain PDF files. Open the sample PDF below and confirm you can read and save it before consenting. If these requirements change materially, we will obtain renewed consent where required.

You can correct your contact details before signing. To update your delivery email, obtain a paper copy or withdraw consent for future electronic records, contact goncharboats@gmail.com. You may also stop before signing and request paper check-in. Withdrawal does not change the effect of records you have already signed. We retain those records under our retention policy and applicable legal obligations.

Your signatures will be associated with the exact document versions presented to you. We record the time of signing, booking and participant identifiers, the signature image, technical access information and the document integrity hashes. Signed PDFs can be downloaded from your private link. In live service a delivery email is queued after signing; the download remains available even if email delivery is delayed.

By selecting 'I can open and save PDFs; I agree', you consent to this electronic process. This consent does not itself sign the rental agreement or any release.

Electronic signing certificate

This certificate records the electronic signing event. It adds no terms to the signed instrument.
